MANAGEMENT & CONSULTANCY

Clear direction.
Practical delivery.

The planning, people and technical work that move a business forward.

FINTECH / GAMING / REGULATION / I.T. SERVICES / CONSTRUCTION

Based in the Philippines. Focused on the work ahead.

WHO WE ARE

One company. Several ways forward.

Providelabs Corporation began in construction in 2019. Management and financial consultancy followed in 2020, with platform creation added in 2023. Today, we bring business planning together with the systems, people and technical work needed to carry it through.

Providelabs Management Consultancy

Providelabs Management Consultancy was created to better serve the growing needs of Providelabs' clientele. It gives clients focused support in business planning, regulatory coordination and operational development, complementing Providelabs Corporation's wider work in technology and construction.

01	**Management & consultancy**	A clearer plan for the business you want to build.
02	**Fintech & gaming**	Bring the commercial, technical and operational pieces together.
03	**Regulatory coordination**	Work through requirements with the right preparation.
04	**I.T. services & digital systems**	The websites, software and infrastructure behind your operation.
05	**Construction & technical works**	Practical experience in the spaces and systems businesses depend on.

MANAGEMENT & REGULATORY COORDINATION

Make the next step clearer.

Business plans bring decisions, documentation and people together. We help organize that work so the next step is clear and the right people are involved.

Management & consultancy

- Business planning and setup support
- Operational and project coordination
- Stakeholder engagement
- Financial application preparation

Regulatory coordination

- Requirements and documentation review
- Application and submission support
- Coordination with agencies and advisers
- Follow-through on requested information

Client representation and licensing support, August 2024.

Licensing and financing decisions remain with the relevant authority or provider. We help clients prepare and coordinate; approvals are not guaranteed.

FINTECH & GAMING

Connect the platform to the business.

A platform is only one part of an operation. We help clients clarify their requirements, explore suitable technology and coordinate the work around a launch or expansion.

SiGMA Asia 2026. Photo: SiGMA World.

Define the requirement

Commercial priorities, operating workflows and platform needs.

Coordinate the work

White-label software, payment gateway integration planning and technical coordination.

Prepare the next step

Launch dependencies, documentation and responsibilities.

I.T. SERVICES & DIGITAL SYSTEMS

The systems behind the business.

From equipment and infrastructure to websites and software, we help put the technology in place for your team to do its work.

01 Hardware procurement & deployment

Requirements, sourcing, equipment configuration and rollout planning for workstations, servers and connected systems.

02 Software white labeling

Platform configuration, brand adaptation and workflows, with integrations and a clearly defined handover.

03 Websites & applications

Company websites, landing pages and custom business tools, with content, development and launch support.

04 Networks & infrastructure

Connectivity, firewall configuration, server administration and on-premises or cloud deployment support.

05 Security & monitoring

Authorized vulnerability assessment, application testing, hardening, firewalls and performance monitoring.

06 Maintenance & support

Content updates, application maintenance, troubleshooting and agreed monitoring or support arrangements.

Payment gateway integrations can be scoped around your platform, provider and access requirements.

BUSINESS SYSTEMS

Less paperwork. Better-connected workflows.

Our technical work covers the development, deployment and support of systems that help people manage routine tasks and keep information moving.

WEBSITES

Business websites & portals

Website development and maintenance, from server setup and backend configuration to deployment and ongoing content updates.

WORKFORCE

Attendance monitoring systems

Digital attendance tools with automated monitoring and face-recognition features, supported by deployment, testing and maintenance.

ACCESS

Digital pass issuance systems

QR-based visitor passes that support request processing, guest verification and operational tracking.

HUMAN RESOURCES

HR leave management systems

Web-based submission, processing, approval and monitoring of employee leave requests.

REGISTRATION

Enterprise registration systems

Digital registration platforms that help organize submissions and streamline application workflows.

APPROVALS

Staff request & approval systems

Digital pass-slip and approval workflows that replace manual forms and make requests easier to track.

INFRASTRUCTURE & SECURITY

Look beyond the interface.

A useful system needs an environment that is configured, maintained and understood. Our technical experience extends into server operations, networks and security-focused administration.

SERVER OPERATIONS

Web server operations & application security

Web server deployment and Linux administration for high-volume online platforms, including application firewalls, performance monitoring, threat analysis and server hardening.

INFRASTRUCTURE

Network & infrastructure deployment

Server and network planning, routing, firewall configuration and connectivity, with support for CCTV, access-control systems and I.T. operational documentation.

The handover matters, too. We help document the setup and agree on maintenance, monitoring and support responsibilities.

Security testing is carried out only with explicit authorization and an agreed scope.

CONSTRUCTION & TECHNICAL WORKS

Practical roots.
Built into our approach.

Construction is where Providelabs began. We bring that practical perspective to design, technical work and coordination across building disciplines.

Don Bosco Academy, Bacolor, Pampanga.

Cargo Haus Warehouse, Clark, Pampanga.

- General construction and architectural design
- Electrical, mechanical and fire protection
- Plumbing, waterproofing and sewage treatment
- Technical coordination and project support

LEADERSHIP

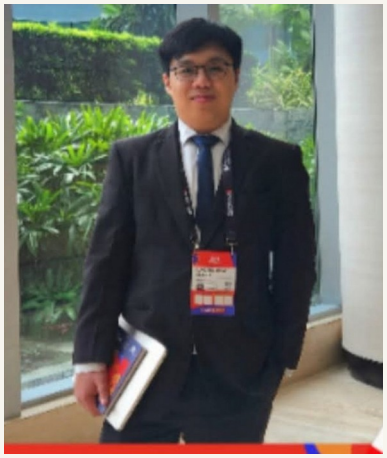

The people behind Providelabs.

PRESIDENT

Davis de Leon

Davis de Leon, President of Providelabs Corporation, brings a relationship-led approach to the company's consultancy, technology and construction work. He represents Providelabs in business discussions and industry gatherings, with an emphasis on understanding what clients need and building lasting connections. His involvement extends to community initiatives in Taytay, including support for senior citizens, rice distribution and relief visits. That hands-on presence reflects a company culture that values personal relationships, practical support and responsibility beyond business.

DIRECTOR & CORPORATE SECRETARY

Luke Matthew de Leon

Luke Matthew de Leon brings experience across fintech, virtual currency, venture capital, I.T. operations and executive support for AI-enabled businesses. His background spans regulatory coordination, corporate governance, technology procurement, infrastructure oversight and collaboration with public- and private-sector stakeholders. He has also supported U.S.-based senior leaders, strengthening executive workflows, coordinating international engagements and turning complex priorities into practical next steps. With an academic foundation in economics and international development, he brings both commercial perspective and attention to detail to his role as Director and Corporate Secretary of Providelabs Corporation, helping connect client needs with the right people, processes and follow-through.

RECOGNITION & ENGAGEMENT

Part of the wider business conversation.

FINEXT / DUBAI / FEBRUARY 2024

Excellence in Financial Consulting

Providelabs received the Excellence in Financial Consulting Award at the FiNext Awards & Conference in Dubai in February 2024.

Industry engagement, Manila, June 2024.

Conversations across markets

International business discussions and SiGMA Asia participation in 2024, 2025 and 2026 create opportunities to exchange ideas, meet people and explore how our services can support their plans.

BEYOND THE BUSINESS

Part of the communities around us.

Community gatherings, rice support and relief visits are part of our story, too. They reflect the relationships behind Providelabs and our connection to Taytay.

San Isidro, Taytay. Community relief visit, July 27, 2025.

Rice support / June 2025

An initial 100 bags of rice shared with residents of San Isidro, Taytay.

Senior citizens / June 2024

Community participation and household items shared at a Taytay association gathering.
